

REEFER PRE-TRIP CHECKLIST

Premier
TRAILER LEASING

Pre-trip inspections are a great tool to add to your reefer maintenance process to head off problems. This handy checklist makes the process super easy for your team.

-
-
- Fuel:** Check that your reefer diesel fuel supply is adequate.
 - Automated Pre-Trip:** Start Automated Reefer Pre-Trip on your reefer unit.
 - Cargo Box:** Inspect the interior and exterior of the cargo box to check for leaks, loose or broken parts, and other damage.
 - Doors & Seals:** Verify the cargo doors and weather seals are in good condition. The doors should latch securely and the weather seals should fit tightly.
 - Defrost Drain:** Check the defrost drain hoses and fittings to make sure they are open.
 - Automated Pre-Trip:** Ensure no alarms were detected.

Quick Tip! Always make sure the reefer unit is turned off during loading/unloading times and doors remain closed at all times otherwise.
